

# Hot Melt Glue

BH-4

Weasy

## Technical Data Sheet

### Product Description

The outside cover of glasses case uses hot melt glue, which can replace the traditional \* solvent glue, solving many years of environmental pollution problems. And it improves efficiency and reduces costs. Weasy hot melt glue can be used for bonding PU, mixed PU / PVC (semi-PU) and some PVC materials.

### Models & Features

SN133	Long open time, great structure strength, high performance. It needs to be finished operation within open times (about 10 mins).
BH-4	high pressure sensitive, high flowability, low temperature operation, fast melting speed, suitable for summer/winter operation
BH-5	high pressure sensitive, high flowability, low temperature operation, fast melting speed, suitable for summer/winter operation, better performance in high temperature.
AF111G	Long open time, great structure strength, high performance. It needs to be finished operation within open times (about 10 mins). Good performance in high temperature, and can fix the inside size may not fit.
